NEW TURNIP—VADCO-JAPPO			
Introduced by Van Antwerp's. Reg. U. S. Pat. Off.			
This wonderful new Turnip which was introduced by us is now the South's leading variety. You can recommend it to your trade, as it will grow and yield a big crop when Purple Top Turnip and other varieties fail. It is desirable for home gardens, market gardeners and canning factories. The tops grow upright and are excellent for Turnip Greens and practically free from insect attacks. Genuine stock of this wonderful new turnip can only be procured direct from Van Antwerp's and packed in pound sealed boxes. (Originators' Stock. Sealed Boxes Only).

CROW-TOX

All growers of seed corn are rapidly realizing the fact that crows, pheasants, blackbirds and other corn-pulling birds and animal pests, such as squirrels, woodchucks, gophers, moles, etc., are causing havoc and untold damages to corn while it is germinating sprouting and rooting, and that protection must be given growing corn during that stage.

A little goes a long way. Its cost to use per acre is but 15c to 20c. Therefore, you should not think of planting corn without first treating it with "Crow-Tox."
